

Aceh DP

Harimau Tiger captures the classic characteristics of a Sumatran coffee while also offering a sweet, cleaner profile and higher cup quality than a standard "Mandehling DP." We look for coffees that have a balance of sweetness with the earthy, herbaceous, and savory notes that are common to coffees from this region, and we pay close attention to the uniformity of the prep in these lots.

For more information about coffee production in Sumatra, visit our [Sumatra page](#).

ID# 18027
