

Albeiro Perdomo, Finca El Faldon - Gaitania, Tolima (GrainPro)

Finca Faldonis a 7 hectare farm belonging to the family of Mr. Albeiro Perdomo. It is located in the Vereda of San Agustin near the town of Planadas in the state of Tolima, Colombia. The farm is made up of 100% Castillo trees which are about 3 years old and sit at an average of about 1,720 meters above sea level. He picks, pulps and ferments his coffee on the farm for about 22 hours, depending upon the weather. He then washes the coffee with clean water a few times to remove any lingering mucilage and dries in a parabolic drier at about 3cm for approximately 10 days. The coffee is allowed to rest in a small warehouse for 15 days before he takes it to town and delivers it to the co-op. Cooperativa de Caficultores del Sur del Tolima. CAFISUR

It is very common in this area for small producers to band together in associations or cooperatives in order to buy in bulk, network among themselves and to negotiate with the FNC for government programs. Coffee from Tolima was difficult to find even six years ago because of the presence of Guerilla activity in the area but now the roads are open and some wonderful coffees are coming out.

ID# 6930

Origin	Colombia
Region	Planadas, Tolima
Farm	El Faldon
Variety	Castillo
Altitude	1,720 Masl
Proc. Method	Fully Washed and Sun dried
