

Banexport - Las Nubes - Geisha Varietal (GrainPro) (Europe)

GEISHA

Get ready Europe! Cafe Imports, Finca Las Nubes, and Banexport have created an exclusive partnership to bring this amazing coffee to market from our European warehouse. We have three specific variety separations shipping from this harvest: Geisha, Rume Sudan, and Laurina

We view this as an amazing opportunity to highlight variety specific attributes in the cup side by side.

The attention to detail and processing techniques executed by Camilo and his staff at Finca Las Nubes are world class. We are seeing some of the most extreme examples of innovation at the farm level in Colombia.

We are so excited for you to taste this coffee!

ID# 7089

Origin	Colombia
Region	Valle de Cauca
Farm	Las Nubes
Variety	Geisha
Altitude	1900-2000m
Proc. Method	Fully washed, dried on raised beds

Geisha: An Ethiopian descendent, Geisha had been trialed in Latin America since the mid 50's by researches seeking new means of disease resistance. Shelved for poor cup quality and yield due to being grown at too low of altitudes, the Geisha variety did not come to prominence until Price Peterson won the Best of Panama

contest with it in 2006. In the decade since, the Geisha variety has ascended to the ranks of coffee variety superstardom. Geisha coffee typically offers a very floral cup with loads of citrus acidity. While Central American Geishas are commonly described as tea-like, with a lighter body and moderate sugar levels, those grown in Colombia frequently have a heavier mouthfeel and sweeter cup.
