

# Community Coffee - Buenos Aires - Bourbon - Honey (GrainPro)

High up on the north face of Volcan de Santa Ana, Buenos Aires is one of the best coffee areas of El Salvador. It's a tight-knit community where farmers help harvest each other's cherries.

The Rio Zarco mill receives beans from more than 80 Buenos Aires farmers, from which they filter out bad tasting Catimor to produce a Red Bourbon, Typica, Pacamara and Kenya lot from farms starting at 1450 m up to 1740.

Every year we select around a dozen farms worth processing on their own, due to special varieties or a clear commitment to quality; these are the Buenos Aires Microlots. San Roberto, which placed 1st in the C.o.E. is also located in this area.

ID# 9712

Origin	El Salvador
Region	Volcan de Santa Ana
Farm	Buenos Aires Community
Variety	Bourbon
Altitude	1450-1740 masl
Proc. Method	Honey
