

Eclosierra Sierra Nevada De Santa Marta - FLO: 22057

"Red Eclosierra" or Ecological Producers of the Sierra Nevada de Santa Marta, is a cooperative of 18 groups of 600 families farming on 900 small farms. Their income was traditionally generated from coffee, but they gradually diversified into organic Honey and Cacao production as well. Since they are so close to the natural reserves, and in order to live in harmony with their environment, Red Eclosierra farmers always reserve a part of their farms for forestry.

As a certified Organic and Fairtrade organization, Eclosierra encourages members and their families to see the social and economic benefits of using modern production processes of organic products. This generates sustainable income, which guarantees a better life for members.

ID# 6061

Origin	Colombia
Region	Sierra Nevada de Santa Marta
Farm	600 families on 900 small farms
Variety	Typica, Colombia and Castillo
Altitude	1,000 to 1,300 Masl
