

Kainamui - New Ngariama F.C.S. - Kirinyaga - AA (VacPack)

The Kinamui factory serves about 1,800 smallholder coffee farmers who are members of the New Ngariama Farmers Cooperative Society, About 600 of whom are women. The smallholders own an average of 200 trees on less than half a hectare of land. Farmers in the area grow gravellea, macademia nuts, eucalyptus, tea, corn, and bananas in addition to coffee. The factory receives field visits from agricultural ministers and agro-companies who offer training programs. The F.C.S. also provides prefinancing for farmers to allow them to pay school fees, production costs, and in case of emergencies.

For more information about coffee production in Kenya, visit our [Kenya Origin Page](#).
