

# La Joya - Finca Gravilias - Honey (GrainPro)

The Costas Café Imports is carrying are all sourced directly from micromills and producers, who were paid at the Farm Gate level. We managed local transportation, dry-milling, consolidation, and exportation of the coffees. This experience is extremely valuable, as it gives us a better understanding of what it takes to get coffee from cherry to export quality in GrainPro and jute with its corresponding marks.

Café Imports is excited to bring you, once again, high-quality and traceable microlots from Costa Rica.
