

La Joya - Gravilias (GrainPro)

The Costa's Cafe Imports is carrying this spring (2014) are all sourced directly from micro-mills and producers were paid at the Farm Gate level. We managed local transportation, dry-milling, consolidation, and exportation of the coffees. This experience is extremely valuable as it gives us a better understanding of what it takes to get coffee from cherry to export quality in GrainPro and Yute with its corresponding marks.

Cafe Imports is excited to bring you, once again, high-quality and traceable microlots from Costa Rica.

ID# 6424
