

Pulped Natural - Fazenda Rainha - Yellow Bourbon (GrainPro)

Fazenda Rainha is managed by José Renato G. Dias, an agricultural engineer with a specialization in coffee production. The farm is comprised of 280 hectares of which 200 hectares are planted with mostly Yellow Bourbon, some Icatu, Yellow Catuai, Mundo Novo, and Acaiá. It is BSCA and Utz certified.

Coffee is processed at peak ripeness with handheld mechanical picking equipment over a cloth to avoid contact with the ground. After being harvested, the coffee cherry is pulped and spread on courtyards for drying. The coffee is dried slowly in the sun until reaching 11% humidity. After drying, the coffee is conditioned in wooden graineries.

All of Fazenda Rainha's employees reside on the farm and they are provided with health plans and unlimited hospital care. There is a school onsite for the workers' children called the Pedro Roza IT School.

Fazenda Rainha has been a finalist in Cup of Excellence Brazil in 2000, 2001, 2005, 2006, 2008, 2009, 2010, and was awarded first place in the 2011.

Amidst the unbelievable landscape at Fazenda Rainha is a chapel designed by the

ID# 7315

Origin	Brazil
