

## Rio Zarco - Bourbon - Washed (GrainPro)

When the bags arrive at the mill, Rio Zarco takes samples and puts them through a computer program which calculates the percentage of ripe cherry as opposed to green, semi-ripe, dry, and floating cherries. This way there is an objective standard to measure quality, and farmers who have picked well receive a bonus.

We are excited to be able to showcase these coffees from small producers in Chalatenango that are producing great coffees.

ID# 9746

Origin	El Salvador
Region	Chalatenango
Variety	Bourbon
Altitude	1400 masl
Proc. Method	Washed
